SURETEK

Growth That Businesses Deserve

Delivering end-to-end IT services that enable agility, scalability, and long-term success for businesses.

Who We Are

Suretek is a well-established IT services and software development company with 10+ years of proven experience in delivering reliable and innovative technology solutions. Since its inception, we have built a strong reputation for quality, consistency, and long-term client partnerships. With a mature delivery model and a skilled team of professionals, we support organizations across diverse industries worldwide.

Our global presence, combined with deep domain knowledge and evolving technical expertise, enables us to deliver scalable, secure, and future-ready solutions. At Suretek, experience, stability, and trust form the foundation of everything we do.

We Are Offering

1. IT Consulting:
Empower your business with expert IT consulting that drives innovation, efficiency, and digital transformation.

2. Software Development:
Build powerful, scalable, and secure software solutions tailored to your business goals.

3. Mobile Apps:
Engage customers anywhere with intuitive, high-performance mobile apps for Android and iOS.

4. AI Solutions:
Leverage AI-driven insights and automation to accelerate growth and make smarter business decisions.

5. Maintenance:
Keep your systems running flawlessly with our proactive IT maintenance and support services.

6. Web Application:
Transform your online presence with custom web applications built for speed, security, and seamless user experience.

7. Team Augmentation:
Scale your development capacity fast with skilled tech professionals through our team augmentation services.

8. Digital Design and Creative Services:
Elevate your brand with stunning digital designs and creative solutions that captivate and convert.

Our Successful Ongoing Projects

Next-Gen Solutions for Quick Service Restaurants

We are successfully delivering QSR software development and maintenance services for an ongoing client with 100% satisfaction. Our team drives innovation through new feature development, next-gen platform upgrades, and a powerful mobile app, ensuring seamless performance and reliability. We continue to empower QSR businesses with smart, efficient, and future-ready technology solutions.

Your Perfect Match, Powered by Innovation

We developed a matchmaking mobile application delivering a seamless, engaging, and intuitive user experience. Our team handled end-to-end development, including UI/UX design, backend integration, and performance optimization. The client was highly satisfied with our timely delivery, innovative solutions, and reliable support, showcasing our expertise in user-centric mobile app development.

AI-Powered Dental Inventory for Smarter Clinics

We built a cloud-based, AI-driven inventory management platform for a multi-location dental network, enabling real-time stock visibility, automated vendor ordering, and seamless integration with leading dental practice systems. The solution improved accuracy, reduced wastage, and ensured continuous supply availability across clinics

Technologies We Specialize In

Microsoft .NET	ASP.NET	Azure	tableau	Drupal
DevExpress	Entity Framework	android	AJAX	ANGULAR
aws	druid	iOS	Vue.js	THE APACHE SOFTWARE FOUNDATION
NEXT.JS	.NET ASP|MVC	git	LINQ .NET	hadoop
jQuery write less, do more.	Laravel	Jasper	Java	tableau
snowflake	Google Cloud	React	python	node JS
Joomla!	Informatica	Perl	React Native	MySQL
talend	APACHE JMeter	CodeIgniter	Flutter	NuxtJS
Microsoft Silverlight	Microsoft SQL Server	PrestaShop	php	webpack	ZEND FRAMEWORK

Our Domain Expertise

Targeted solutions across manufacturing operations, industrial IoT, and AI-driven intelligence.

We enable manufacturers to transform their operations through an integrated suite of Manufacturing Execution, Industrial IoT, Advanced Analytics, and AI-driven solutions. Our services help improve efficiency, quality, visibility, and decision-making across the entire manufacturing value chain.

Manufacturing & Operations Excellence

- **End-to-End Assembly Line Integration**
  Seamless integration of shop-floor equipment, systems, and workflows for synchronized production.

- **Material & Inventory Management**
  Real-time visibility and control of materials, WIP, and finished goods.

- **Production Planning & Scheduling**
  Optimized production plans aligned with demand, capacity, and constraints.

- **Production Execution & Monitoring**
  Live tracking of production performance, KPIs, and bottlenecks.

- **Quality Management**
  In-process and end-of-line quality checks with traceability and compliance.

- **Maintenance Management**
  Asset lifecycle management with preventive and predictive maintenance capabilities.

- **Work Order & Workflow Management**
  Digitized work instructions and execution across operations.

Industrial IoT & Connectivity

- **IoT Device Connectivity**
  Integration with sensors, test benches, machines, and smart devices.

- **Data Collection in IoT Environments**
  Capture high-frequency data from temperature, humidity, and process sensors.

- **Connectivity & Interoperability Protocols**
  REST APIs, MQTT, AMQP (RMQ), CFX, Wi-Fi, Bluetooth.

- **Device-to-Device & Device-to-Cloud Communication**
  Reliable data flow across edge, on-premise, and cloud environments.

- **Edge Computing & Cloud Hosting**
  Low-latency processing at the edge with scalable cloud analytics.

- **High-Frequency Sensor Data Processing**
  Real-time ingestion and processing of large IoT data streams.

- **Secure & Scalable IoT Architecture**
  Enterprise-grade security with scalable deployment models.

Data, Analytics & Visualization

✔ **Data Warehousing**
Centralized, structured storage for manufacturing and IoT data.

✔ **Advanced Reporting & Productized Analytics**
Standardized and customizable dashboards for operational and executive insights.

✔ **Real-Time Monitoring & Decision Support**
Actionable insights powered by live data streams.

✔ **Data Visualization**
Intuitive, role-based dashboards for operators, engineers, and management.

✔ **Operational KPI Management**
Standardized KPIs for performance tracking and benchmarking.

AI-Driven Manufacturing Intelligence

✔ **AI-Based Production Planning & Scheduling**
Adaptive scheduling using predictive and optimization models.

✔ **AI-Driven Material & Inventory Optimization**
Demand forecasting and intelligent replenishment strategies.

✔ **Predictive Maintenance of Production Assets**
Machine learning models to predict failures and reduce downtime.

✔ **Advanced Analytics & Machine Learning**
Pattern detection, anomaly identification, and continuous improvement insights.

✔ **Anomaly Detection & Root Cause Analysis**
Early identification of deviations and automated root cause insights.

✔ **AI-Powered Decision Support**
Recommendations and simulations to guide operational decisions.

User Experience & Governance

✔ **Intuitive User Interfaces**
User-centric design for faster adoption and operational efficiency.

✔ **Role-Based Access & Controls**
Secure, permission-based access aligned with organizational roles.

✔ **Third-Party Software Integration**
Seamless integration with ERP, PLM, QMS, and other enterprise systems.

✔ **Audit Trails & Compliance Management**
Complete traceability to support regulatory and quality compliance.

✔ **Data Security & Governance**
Enterprise-grade security, data privacy, and governance controls.
